Dear Hiring Manager,

I would like to voice my strong interest in your Critical Care Physician Assistant fellowship program at Staten Island University Hospital. I'm a physician assistant student that is graduating in December 2021 and I previously rotated through SIUH for my emergency medicine rotation.

I worked closely with all levels of hospital staff, from nurses, physician assistants, residents and attendings, to receive intense emergency medicine instruction and clinical expertise. My EM experience prepared me very well for my other clinical rotations, by virtue of performing many bedside procedures and creating patient care plans. Being trusted to perform these procedures was a massive confidence boost in myself and my abilities, and I looked forward to every new opportunity to try something new. I truly felt I was making a difference in the community where I was born and raised, and I want to continue to maximize patient health outcomes and increase their satisfaction with your services. I remain dedicated to compassionate care, and I believe I'm a very strong candidate for further learning in the fellowship program.

I'm looking forward to speaking with you further about the details and collaboratory nature of the fellowship.

Sincerely,
Nicholas Burney
