Emergency Medicine,

Staten Island University Hospital, Staten Island, New York

- Worked to elicit patient history, perform thorough physical exams, and create treatment plans with other physician assistants, resident physicians, and attending physicians at a level 1 trauma center
- Interpreted CT scans, X-rays, ultrasounds, echocardiograms, and EKGs with the health care providers and treated patients with both acute and chronic conditions
- Independently performed various bedside procedures such as laceration repair, nasogastric tube placement, abscess drainage, limb splinting, high-quality CPR, echocardiograms and IV placement
- Assisted the critical care unit and aided providers with numerous trauma and stroke patients

Urgent Care

Statcare – Eastern Parkway, Brooklyn, New York

- Elicited patient history, performed focused physical exams and created treatment plans with other physician assistants in a high-volume diverse urban setting
- Successfully diagnosed and treated multiple acute conditions, such as urinary tract infections, bacterial vaginosis, medication overdose, and herpes zoster with the supervision of the PAs
